Deadline for manuscript
submissions:

31 August 2021

Message from the Guest Editors

We are planning a Special Issue of the journal Sustainability with a focus on ropeways. The title will be rather general, namely “Ropeways: New Trends for Applications, Techniques, and Simulation”. We intend to collect reviews of both scientists at Universities as well as engineers from leading companies to give an overview of current research and industrial activities. Our main goal is to bring together pure academic research and practical engineering to understand the problems and to bridge the potential gap between the two approaches. In particular, due to increasing computational power, the development of algorithms in simulation sciences has also become more and more important in ropeway planning. We believe that an overview of current research should be of interest for any scientist, technician, or engineer working in this field.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
